Manual Test Cases – Registration

Module: Registration
Requirement: FR-006 – Registration (see `requirements/requirements.md`)
Application: https://demowebshop.tricentis.com/register
Prepared: 24 October 2026

> **Test data note:** Per FR-006, do not create uncontrolled accounts on the public demo site. Use a controlled environment or an approved disposable test email (for example `qa.<yourname>+<date>@example.com`) for the cases that complete a registration (TC_REG_001, TC_REG_002, TC_REG_014, TC_REG_017).

Validation messages quoted below were read from the live register page on 24 Oct 2026. Messages marked *(verify)* are server-side and should be confirmed and recorded on the first run.

Preconditions (all cases unless stated)

- The user is logged out (guest).
- Browser cache and cookies are cleared, or a fresh incognito window is used.
- The Register page is open: https://demowebshop.tricentis.com/register

Summary

TC ID	Title	Type	Priority
TC_REG_001	Register with all valid details	Positive	High
TC_REG_002	Register without selecting gender	Positive	Medium
TC_REG_003	Register page fields and controls are displayed	UI	High
TC_REG_004	Submit the form with all fields empty	Negative	High
TC_REG_005	First name left empty	Negative	High
TC_REG_006	Last name left empty	Negative	High
TC_REG_007	Email left empty	Negative	High
TC_REG_008	Invalid email format	Negative	High
TC_REG_009	Password left empty	Negative	High
TC_REG_010	Password shorter than 6 characters	Negative	High
TC_REG_011	Password of exactly 6 characters (boundary)	Boundary	Medium
TC_REG_012	Confirm password does not match	Negative	High
TC_REG_013	Confirm password left empty	Negative	High
TC_REG_014	Register with an email that already exists	Negative	High
TC_REG_015	Leading/trailing spaces in email	Edge	Low
TC_REG_016	Password fields are masked	UI / Security	Medium
TC_REG_017	New account can log in after registering	End-to-end	High
TC_REG_018	Register link from the header opens the Register page	Navigation	Medium
TC_REG_019	Keyboard-only registration (Tab order and Enter)	Accessibility	Low

TC_REG_001 – Register with all valid details

Field	Value
Type / Priority	Positive / High
Test data	Gender: Male; First name: `Test`; Last name: `User`; Email: unique approved test email; Password: `Test@123`; Confirm password: `Test@123`

Steps 1. Select Gender **Male**. 2. Enter First name, Last name, and Email. 3. Enter Password and Confirm password. 4. Click **Register**.

Expected result - Registration completes and a confirmation page is shown stating the registration is complete *(verify exact text)*, with a **Continue** button. - The header shows the registered email address and a **Log out** link instead of Register / Log in.

TC_REG_002 – Register without selecting gender

Field	Value
Type / Priority	Positive / Medium
Test data	Gender: none; all other fields valid; unique email

Steps 1. Leave both gender options unselected. 2. Fill all other fields with valid data. 3. Click **Register**.

Expected result - Registration completes successfully. Gender is optional, and no gender validation message is shown.

TC_REG_003 – Register page fields and controls are displayed

Field	Value
Type / Priority	UI / High

Steps 1. Open the Register page. 2. Review the form.

Expected result - Page heading **Register** is shown. - **Your Personal Details** section shows Gender (Male / Female radio buttons), First name, Last name, and Email. - **Your Password** section shows Password and Confirm password. - Required fields are marked with an asterisk (*). - The **Register** button is visible and enabled.

TC_REG_004 – Submit the form with all fields empty

Field	Value
Type / Priority	Negative / High

Steps 1. Leave every field empty. 2. Click **Register**.

Expected result - No account is created, and the user stays on the Register page. - These messages are shown next to their fields: - `First name is required.` - `Last name is required.` - `Email is required.` - `Password is required.` - Confirm password shows its required message *(verify text)*.

TC_REG_005 – First name left empty

Test data: All fields valid except First name is blank.
Steps: 1. Fill all fields except First name. 2. Click **Register**.
Expected result: `First name is required.` is shown, and no account is created.

TC_REG_006 – Last name left empty

Test data: All fields valid except Last name is blank.
Steps: 1. Fill all fields except Last name. 2. Click **Register**.
Expected result: `Last name is required.` is shown, and no account is created.

TC_REG_007 – Email left empty

Test data: All fields valid except Email is blank.
Steps: 1. Fill all fields except Email. 2. Click **Register**.
Expected result: `Email is required.` is shown, and no account is created.

TC_REG_008 – Invalid email format

Field	Value
Type / Priority	Negative / High
Test data (one run each)	`testuser`, `testuser@`, `@example.com`, `test user@example.com`, `test@@example.com`

Steps 1. Fill all fields with valid data, but enter one of the invalid emails. 2. Click **Register** (or move focus out of the Email field). 3. Repeat for each invalid value.

Expected result - `Wrong email` is shown under Email for every value. - No account is created.

TC_REG_009 – Password left empty

Test data: Password and Confirm password blank; other fields valid.
Steps: 1. Leave Password empty. 2. Click **Register**.
Expected result: `Password is required.` is shown, and no account is created.

TC_REG_010 – Password shorter than 6 characters

Field	Value
Type / Priority	Negative / High
Test data	Password: `Ab1@x` (5 chars); Confirm password: `Ab1@x`

Steps 1. Fill valid personal details. 2. Enter the 5-character password in both password fields. 3. Click **Register**.

Expected result - `The password should have at least 6 characters.` is shown. - No account is created.

TC_REG_011 – Password of exactly 6 characters (boundary)

Test data: Password and Confirm password: `Ab1@xy` (6 chars); unique email.
Steps: 1. Fill all fields using the 6-character password. 2. Click **Register**.
Expected result: No password-length error is shown, and registration completes successfully.

TC_REG_012 – Confirm password does not match

Field	Value
Type / Priority	Negative / High
Test data	Password: `Test@123`; Confirm password: `Test@124`

Steps 1. Fill valid personal details. 2. Enter different values in Password and Confirm password. 3. Click **Register**.

Expected result - `The password and confirmation password do not match.` is shown. - No account is created.

TC_REG_013 – Confirm password left empty

Test data: Password: `Test@123`; Confirm password blank.
Steps: 1. Fill everything except Confirm password. 2. Click **Register**.
Expected result: A required-field message is shown for Confirm password *(verify text)*, and no account is created.

TC_REG_014 – Register with an email that already exists

Field	Value
Type / Priority	Negative / High
Precondition	An account already exists for the test email (for example, the one from TC_REG_001).

Steps 1. Fill all fields with valid data, using the existing email. 2. Click **Register**.

Expected result - An error states that the email already exists *(verify exact text)*. - No second account is created, and the user stays on the Register page.

TC_REG_015 – Leading/trailing spaces in email

Test data: Email: `<unique approved email>` (with spaces before and after).
Steps: 1. Fill all fields, adding spaces around the email. 2. Click **Register**.
Expected result: The spaces are trimmed and registration succeeds, or a clear validation message is shown. It must not fail without an error. Record which behavior happens.

TC_REG_016 – Password fields are masked

Steps: 1. Type `Test@123` into Password and Confirm password.
Expected result: Both fields show masked characters, never plain text.

TC_REG_017 – New account can log in after registering

Field	Value
Type / Priority	End-to-end / High
Precondition	TC_REG_001 passed; note its email and password.

Steps 1. Click **Log out**. 2. Click **Log in** and enter the email and password from TC_REG_001. 3. Click **Log in**.

Expected result - The login succeeds, and the header shows the registered email and **Log out**.

TC_REG_018 – Register link from the header opens the Register page

Steps: 1. Open https://demowebshop.tricentis.com/. 2. Click **Register** in the header.
Expected result: The Register page opens at `/register` with the heading **Register**.

TC_REG_019 – Keyboard-only registration (Tab order and Enter)

Steps: 1. Press Tab to move through the form fields in order. 2. Fill each field with valid data using the keyboard. 3. Press Enter on the **Register** button.
Expected result: Focus moves in a logical order (Gender, First name, Last name, Email, Password, Confirm password, Register), each field shows a visible focus indicator, and the form submits.
